EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Cancel the non-elected claims 1-10, 14-23.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: The present invention is directed to a multiplex communication method. Each independent claim identifies the uniquely distinct features: regarding claim 1 (originally filed claim 24), determining a clock master for providing a reference clock information in advance among said plurality of nodes; transmitting data including the reference clock information by said clock master; receiving the reference clock information within the data transmitted from said clock master by nodes other than said clock master; comparing an internal clock information of an internal clock of the node that receives the reference clock information with the reference clock information; slightly advancing, slightly retarding or keeping the internal clock as is, when a difference between the internal clock information and the reference clock information falls within a certain allowance; and updating the internal clock information to the reference clock information, when the difference between the internal clock information and the reference clock information does not fall within the allowance; regarding claim 4 (originally filed claim 25), determining a clock master for providing a reference clock information in advance among said plurality of nodes; transmitting data including the reference clock information by said clock master; receiving the reference clock information within the data transmitted from said clock master by nodes other than said clock master; comparing an internal clock information of an internal clock of a node that receives the reference clock information with the reference clock information; advancing, retarding or maintaining the internal clock as is, when a difference between the internal clock information and the reference clock information falls within a certain allowance; and updating the internal clock information to the reference clock information, when the difference between

the internal clock information and the reference clock information does not fall within said certain allowance. The closest prior art, Tobol (US 5,253,252) and Cao (US 6,700,899) disclose conventional communication systems, either singularly or in combination, fail to anticipate or render the above features obvious..

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kwang B. Yao whose telephone number is 571-272-3182. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chi H. Pham can be reached on 571-272-3179. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
